The Easy Tomato Slicer II

The super-fast and easy way to slice tomatoes just got easier!

Pretensioned for Trouble-Free Performance

Compact, efficient, fast and simple to use, the NEMCO[™] Easy Tomato Slicer has been a staple in foodservice kitchens for its labor- and space-saving advantages. Now, with its new pretensioned cartridge blade-set design, the Easy Tomato Slicer II is safer and more convenient than ever.

No Need to Adjust the Blades

Cut tomatoes and labor. That's it. Now available as a changeable cartridge, the blade set stays properly aligned and tightened without the need to adjust it. That means employees spend less time fiddling with the blades so you:

- Minimize the chances of someone getting cut.
- Ensure a consistently sliced quality product.
- Save time during blade replacement.

Live Longer and Prosper

Building on the tough construction of the Easy Tomato Slicer, the cartridge blade set on this new model ensures even longer-lasting performance.

- By maintaining the blade tension, the cartridge design prevents misalignment that can cause the pusher to make contact with and nick or damage the blades.
- Keeping the blades clean is key to their precision. Now with such an easily removable cartridge, rinsing the blades after use is no problem.
- The blades are razor-sharp stainless steel, while the frame and handles are constructed of commercial-grade aluminum.

Safer Than Ever

Your employees are neither adjusting the blades, nor waiting around for a manager to do it. Rather, changing out the cartridge is a snap for anyone.

- The blade cartridge just slides into place with minimal handling and cannot be installed improperly.
- The slicer's vertical handle and protective guards improve user comfort and safety.
- The slide board is high-density polyethylene.
