1911 Sno-Storm Sno-cone Machine

Made in the USA NEVADA, IA

Nostalgic Looks, Hard-Working Machine

This machine combines convenient features with vintage charm to increase sales. The cabinet has an antique black top, bright blue metal filigree and old-fashioned graphics. It was designed for the concessionaire who wants the best, but with an old-fashion appeal. This nostalgic looking machine has a full-enclosure cabinet design with dual access doors. It also has a high production capacity of 500 lbs. per hour. A fluorescent backlight is built in to complete the look, and guarantees high visibility. In addition, the exclusive blue-tinted polycarbonate panels provide additional protection from the sun, added safety, and a great look, and the stainless steel blades are adjustable to effect the fineness of the crushed ice.

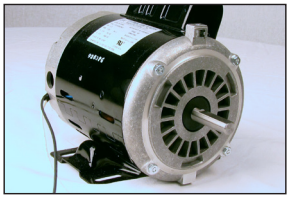
Features

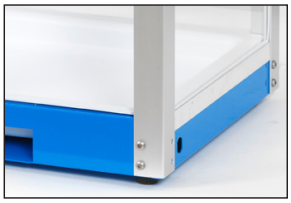
Back-lit Sign

This colorful graphic sign is back-lit with a 15 watt flourescent tube to attract attention.



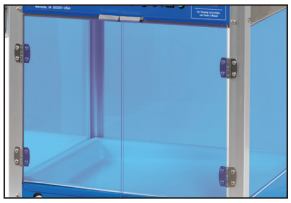
Heavy-Duty Motor

The sno-cone machine features a 1/3 horsepower motor with 1725 rpm. This motor uses a manual safety reset that prevent accidental start-up if the motor is ever jammed. Plus, with Paragon sno-cone machines, you don't have to worry about which model has what motor or certifications. We use the same heavy-duty motor on all models and every machine is ETL and NSF approved. So you can make your choice based on functional needs and budget and not worry about quality.



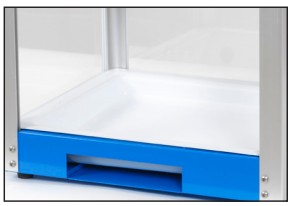
Stainless Steel and Aluminum Construction

The cabinet of the machine is made from stainless steel and aluminum for years of durability and ease of cleaning.



Tinted High-Impact Polycarbonate

The three side panels of the sno-cone machines all use high impact blue tinted polycarbonate for safety. These panels are very easy to clean and will not shatter.



Lighted Serving Compartment

The serving compartment is illuminated to highlight the freshly shaved ice for operator ease and increased impulse sales.
